THE ORIGINS OF NATURAL DYES

Discover a world of vibrant colours derived from the very essence of nature. Our wooden collectibles captivate with dyes extracted from tree barks, leaves, and roots. From turmeric's golden yellows to Jaffra seeds' bold reds and oranges, each colour tell a story. Delicate green shades come alive with the blend of turmeric and indigo. Patience reveals rich blacks, achieved through a month-long process with iron, aged jaggery, and Indian Hog Plum (Myrobalan). Finished to perfection, screwpine leaves lend an alluring shine. Experience the magic of natural dyes in our collection—a fusion of nature's wonders for cherished moments.
